PROFILE SUMMARY

Motivated and detail-oriented B.Tech Artificial Intelligence & Data Science student with hands-on experience in Web Development, Data Science, Software Testing, and Cloud Computing. Skilled in Java, SQL, HTML, CSS, and problem-solving with practical exposure through internships, academic projects, and certifications. Continually deepen expertise in emerging technologies by leading projects that develop innovative solutions with measurable real-world impact. Seeking opportunities to apply technical knowledge, analytical thinking, and collaborative skills in a dynamic technology environment.

Work Experience

Web Development Intern

CodeBind Technologies | Chennai

Aug 2024 - Sep 2024

- Developed responsive web pages using HTML and CSS.
- Created user-friendly website layouts and improved design.
- Worked on front-end development tasks and gained practical experience in website creation.
- Collaborated with team members to understand web development workflows.

Data Science Intern

Corizo

Sep 2024 - Oct 2024

- Collected, cleaned, and analyzed datasets using Python.
- Performed data preprocessing and exploratory data analysis.
- Worked with data visualization techniques to identify trends and patterns.
- Gained practical exposure to machine learning workflows.

Education

Sri Ram Matric Higher sec School

2021 - 2022

Percentage: 78%

Panimalar Engineering College

Artificial Intelligence & Data Science | B.Tech |

Chennai 2022 - 2026

CGPA: 8.9

Skills

Hard Skills

Java, SQL, HTML, CSS, JavaScript (Basics), Manual Testing, Selenium (Basics).

Soft Skills

Detail-oriented, Motivated, Problem-solving, Collaborative skills

Projects

Ola Bike Ride Demand Forecasting

- Developed a machine learning model to predict hourly Ola bike ride demand using historical ride and weather data.
- Performed data preprocessing, feature engineering, and model evaluation to improve forecasting accuracy.
- Developed and implemented advanced predictive analytics models, utilizing time series analysis and machine learning algorithms, to enhance demand estimation accuracy.
- Technologies: Python, Pandas, NumPy, Scikit-Learn, Machine Learning

AI-Based Stock Market Prediction System

- Developing an intelligent prediction system that analyzes historical stock market data and trends.
- Utilized machine learning and deep learning techniques to forecast stock price movements.
- Enhanced prediction accuracy and strengthened decision-making support through targeted analytical improvements.
- Technologies: Python, LSTM, Machine Learning, Deep Learning

Certifications

AWS Academy Cloud Foundations

Data Science Internship Certification Corizo

Java Programming Certification -Qspider

Web Development Internship Certification – CodeBind Technologies
